Chapter 1

Logic

Definition 1.0.0.1. Proposition is a statement that is either true or false, but not both.

1.1 Logical operations

1.1.1 Definition of $\neg$

Definition 1.1.1.1.

$$
\begin{aligned}
&\neg(\text{True}) \\
\overset{\text{def}}{\iff} &\text{False}
\end{aligned}
$$

Definition 1.1.1.2.

$$
\begin{aligned}
&\neg(\text{False}) \\
\overset{\text{def}}{\iff} &\text{True}
\end{aligned}
$$

1.1.2 Definition of $\vee$

Definition 1.1.2.1.

$$
\begin{aligned}
&(\text{True}) \vee (\text{True}) \\
\overset{\text{def}}{\iff} &\text{True}
\end{aligned}
$$

Definition 1.1.2.2.

$$
\begin{aligned}
&(\text{True}) \vee (\text{False}) \\
\overset{\text{def}}{\iff} &\text{True}
\end{aligned}
$$

Definition 1.1.2.3.

$$\begin{aligned} &(\text{False}) \lor (\text{True}) \\ \overset{\text{def}}{\iff} &\text{True} \end{aligned}$$

Definition 1.1.2.4.

$$\begin{aligned} &(\text{False}) \lor (\text{False}) \\ \overset{\text{def}}{\iff} &\text{False} \end{aligned}$$

1.1.3 Definition of $\land$

Definition 1.1.3.1.

$$\begin{aligned} &(\text{True}) \land (\text{True}) \\ \overset{\text{def}}{\iff} &\text{True} \end{aligned}$$

Definition 1.1.3.2.

$$\begin{aligned} &(\text{True}) \land (\text{False}) \\ \overset{\text{def}}{\iff} &\text{False} \end{aligned}$$

Definition 1.1.3.3.

$$\begin{aligned} &(\text{False}) \land (\text{True}) \\ \overset{\text{def}}{\iff} &\text{False} \end{aligned}$$

Definition 1.1.3.4.

$$\begin{aligned} &(\text{False}) \land (\text{False}) \\ \overset{\text{def}}{\iff} &\text{False} \end{aligned}$$

1.1.4 Definition of $\iff$

Definition 1.1.4.1.

$$\begin{aligned} &a \iff b \\ \overset{\text{def}}{\iff} &(a \land b) \lor ((\neg a) \land (\neg b)) \end{aligned}$$

1.1.5 Definition of $\implies$

Definition 1.1.5.1.

$$\begin{aligned} & a \implies b \\ \overset{\text{def}}{\iff} & (\neg a) \lor b \end{aligned}$$

1.2 Boolean algebra

1.2.1 Associativity of $\lor$

Proposition 1.2.1.1.

$$\begin{aligned} & (a \lor b) \lor c \\ \iff & a \lor (b \lor c) \end{aligned}$$

1.2.2 Associativity of $\land$

Proposition 1.2.2.1.

$$\begin{aligned} & (a \land b) \land c \\ \iff & a \land (b \land c) \end{aligned}$$

1.2.3 Commutativity of $\lor$

Proposition 1.2.3.1.

$$\begin{aligned} & a \lor b \\ \iff & b \lor a \end{aligned}$$

1.2.4 Commutativity of $\land$

Proposition 1.2.4.1.

$$\begin{aligned} & a \land b \\ \iff & b \land a \end{aligned}$$

1.2.5 Identity of $\vee$

Proposition 1.2.5.1.

$$\begin{aligned} & a \vee (\text{False}) \\ \iff & a \end{aligned}$$

Proposition 1.2.5.2.

$$\begin{aligned} & (\text{False}) \vee a \\ \iff & a \end{aligned}$$

1.2.6 Identity of $\wedge$

Proposition 1.2.6.1.

$$\begin{aligned} & a \wedge (\text{True}) \\ \iff & a \end{aligned}$$

Proposition 1.2.6.2.

$$\begin{aligned} & (\text{True}) \wedge a \\ \iff & a \end{aligned}$$

1.2.7 Annihilator of $\vee$

Proposition 1.2.7.1.

$$\begin{aligned} & a \vee (\text{True}) \\ \iff & \text{True} \end{aligned}$$

Proposition 1.2.7.2.

$$\begin{aligned} & (\text{True}) \vee a \\ \iff & \text{True} \end{aligned}$$

1.2.8 Annihilator of $\wedge$

Proposition 1.2.8.1.

$$\begin{aligned} & a \wedge (\text{False}) \\ \iff & \text{False} \end{aligned}$$

Proposition 1.2.8.2.

$$\begin{aligned} & (\text{False}) \wedge a \\ \iff & \text{False} \end{aligned}$$

1.2.9 Idempotence of $\vee$

Proposition 1.2.9.1.

$$\begin{aligned} & a \vee a \\ \iff & a \end{aligned}$$

1.2.10 Idempotence of $\wedge$

Proposition 1.2.10.1.

$$\begin{aligned} & a \wedge a \\ \iff & a \end{aligned}$$

1.2.11 Complement of $\vee$

Proposition 1.2.11.1.

$$\begin{aligned} & a \vee (\neg a) \\ \iff & \text{True} \end{aligned}$$

Proposition 1.2.11.2.

$$\begin{aligned} & (\neg a) \vee a \\ \iff & \text{True} \end{aligned}$$

1.2.12 Complement of $\wedge$

Proposition 1.2.12.1.

$$\begin{aligned} & a \wedge (\neg a) \\ \iff & \text{False} \end{aligned}$$

Proposition 1.2.12.2.

$$\begin{aligned} & (\neg a) \wedge a \\ \iff & \text{False} \end{aligned}$$

1.2.13 Absorption of $\vee$ over $\wedge$

Proposition 1.2.13.1.

$$\begin{aligned} & a \vee (a \wedge b) \\ \iff & a \end{aligned}$$

Proposition 1.2.13.2.

$$\begin{aligned} & a \vee (b \wedge a) \\ \iff & a \end{aligned}$$

Proposition 1.2.13.3.

$$\begin{aligned} & (a \wedge b) \vee a \\ \iff & a \end{aligned}$$

Proposition 1.2.13.4.

$$\begin{aligned} & (b \wedge a) \vee a \\ \iff & a \end{aligned}$$

1.2.14 Absorption of $\wedge$ over $\vee$

Proposition 1.2.14.1.

$$\begin{aligned} & a \wedge (a \vee b) \\ \iff & a \end{aligned}$$

Proposition 1.2.14.2.

$$\begin{aligned} & a \wedge (b \vee a) \\ \iff & a \end{aligned}$$

Proposition 1.2.14.3.

$$\begin{aligned} & (a \vee b) \wedge a \\ \iff & a \end{aligned}$$

Proposition 1.2.14.4.

$$\begin{aligned} & (b \vee a) \wedge a \\ \iff & a \end{aligned}$$

1.2.15 Distributivity of $\vee$ over $\wedge$

Proposition 1.2.15.1.

$$\begin{aligned} & a \vee (b \wedge c) \\ \iff & (a \vee b) \wedge (a \vee c) \end{aligned}$$

Proposition 1.2.15.2.

$$\begin{aligned} & (a \wedge b) \vee c \\ \iff & (a \vee c) \wedge (b \vee c) \end{aligned}$$

1.2.16 Distributivity of $\wedge$ over $\vee$

Proposition 1.2.16.1.

$$\begin{aligned} & a \wedge (b \vee c) \\ \iff & (a \wedge b) \vee (a \wedge c) \end{aligned}$$

Proposition 1.2.16.2.

$$\begin{aligned} & (a \vee b) \wedge c \\ \iff & (a \wedge c) \vee (b \wedge c) \end{aligned}$$

1.2.17 Double negation

Proposition 1.2.17.1.

$$\begin{aligned} & \neg(\neg a) \\ \iff & a \end{aligned}$$

1.2.18 De Morgan's laws

Proposition 1.2.18.1.

$$\begin{aligned} & \neg(a \vee b) \\ \iff & (\neg a) \wedge (\neg b) \end{aligned}$$

Proposition 1.2.18.2.

$$\begin{aligned} & \neg(a \wedge b) \\ \iff & (\neg a) \vee (\neg b) \end{aligned}$$

1.3 Basic Proposition

Proposition 1.3.0.1.

$$
\begin{aligned}
& (a \land (\neg b)) \lor b \\
\iff & a \lor b
\end{aligned}
$$

Proof of Proposition 1.3.0.1

$$
\begin{aligned}
& (a \land (\neg b)) \lor b & \\
\iff & (a \lor b) \land ((\neg b) \lor b) & \text{Proposition 1.2.15.2} \\
\iff & (a \lor b) \land (\text{True}) & \text{Proposition 1.2.11.2} \\
\iff & a \lor b & \text{Proposition 1.2.6.1}
\end{aligned}
$$

1.4 Proof technique

Proposition 1.4.0.1.

$$
\begin{aligned}
& a \iff (\text{True}) \\
\iff & a
\end{aligned}
$$

Proof of Proposition 1.4.0.1

$$
\begin{aligned}
& a \iff (\text{True}) & \\
\overset{\text{def}}{\iff} & (a \land (\text{True})) \lor ((\neg a) \land (\neg(\text{True}))) & \text{Definition 1.1.4.1} \\
\overset{\text{def}}{\iff} & (a \land (\text{True})) \lor ((\neg a) \land (\text{False})) & \text{Definition 1.1.1.1} \\
\iff & a \lor ((\neg a) \land (\text{False})) & \text{Proposition 1.2.6.1} \\
\iff & a \lor (\text{False}) & \text{Proposition 1.2.8.1} \\
\iff & a & \text{Proposition 1.2.5.1}
\end{aligned}
$$

Proposition 1.4.0.2.

$$
\begin{aligned}
& a \implies b \\
\implies & (a \lor c) \implies (b \lor c)
\end{aligned}
$$

Proof of Proposition 1.4.0.2

$$
\begin{aligned}
& (a \implies b) \implies ((a \vee c) \implies (b \vee c)) && \\
\overset{\text{def}}{\iff} & ((\neg a) \vee b) \implies ((a \vee c) \implies (b \vee c)) && \text{Definition 1.1.5.1} \\
\overset{\text{def}}{\iff} & ((\neg a) \vee b) \implies ((\neg(a \vee c)) \vee (b \vee c)) && \text{Definition 1.1.5.1} \\
\overset{\text{def}}{\iff} & (\neg((\neg a) \vee b)) \vee ((\neg(a \vee c)) \vee (b \vee c)) && \text{Definition 1.1.5.1} \\
\iff & ((\neg(\neg a)) \wedge (\neg b)) \vee ((\neg(a \vee c)) \vee (b \vee c)) && \text{Proposition 1.2.18.1} \\
\iff & (a \wedge (\neg b)) \vee ((\neg(a \vee c)) \vee (b \vee c)) && \text{Proposition 1.2.17.1} \\
\iff & (a \wedge (\neg b)) \vee (((\neg a) \wedge (\neg c)) \vee (b \vee c)) && \text{Proposition 1.2.18.1} \\
\iff & (a \wedge (\neg b)) \vee (((\neg a) \wedge (\neg c)) \vee (c \vee b)) && \text{Proposition 1.2.3.1} \\
\iff & (a \wedge (\neg b)) \vee ((((\neg a) \wedge (\neg c)) \vee c) \vee b) && \text{Proposition 1.2.1.1} \\
\iff & (a \wedge (\neg b)) \vee (b \vee (((\neg a) \wedge (\neg c)) \vee c)) && \text{Proposition 1.2.3.1} \\
\iff & ((a \wedge (\neg b)) \vee b) \vee (((\neg a) \wedge (\neg c)) \vee c) && \text{Proposition 1.2.1.1} \\
\iff & (a \vee b) \vee (((\neg a) \wedge (\neg c)) \vee c) && \text{Proposition 1.3.0.1} \\
\iff & (a \vee b) \vee ((\neg a) \vee c) && \text{Proposition 1.3.0.1} \\
\iff & ((a \vee b) \vee (\neg a)) \vee c && \text{Proposition 1.2.1.1} \\
\iff & ((\neg a) \vee (a \vee b)) \vee c && \text{Proposition 1.2.3.1} \\
\iff & (((\neg a) \vee a) \vee b) \vee c && \text{Proposition 1.2.1.1} \\
\iff & ((\text{True}) \vee b) \vee c && \text{Proposition 1.2.11.2} \\
\iff & (\text{True}) \vee c && \text{Proposition 1.2.7.2} \\
\iff & \text{True} && \text{Proposition 1.2.7.2}
\end{aligned}
$$

Proposition 1.4.0.3.

$$
\begin{aligned}
& a \implies b \\
\implies & (a \wedge c) \implies (b \wedge c)
\end{aligned}
$$

Proposition 1.4.0.4. Contrapositive

$$
\begin{aligned}
& a \implies b \\
\iff & (\neg b) \implies (\neg a)
\end{aligned}
$$

Proposition 1.4.0.5. Transitive property of $\implies$.

$$
\begin{aligned}
& (a \implies b) \wedge (b \implies c) \\
\implies & a \implies c
\end{aligned}
$$

Proposition 1.4.0.6.

$$\begin{aligned} & a \iff b \\ \iff & (a \implies b) \land (b \implies a) \end{aligned}$$

Proposition 1.4.0.7.

$$\begin{aligned} & a \iff b \\ \implies & (a \lor c) \iff (b \lor c) \end{aligned}$$

Proposition 1.4.0.8.

$$\begin{aligned} & a \iff b \\ \implies & (a \land c) \iff (b \land c) \end{aligned}$$

Proposition 1.4.0.9. Symmetric property of $\iff$.

$$\begin{aligned} & a \iff b \\ \iff & b \iff a \end{aligned}$$

Proposition 1.4.0.10.

$$\begin{aligned} & a \iff b \\ \iff & (\neg a) \iff (\neg b) \end{aligned}$$

Proposition 1.4.0.11. Transitive property of $\iff$.

$$\begin{aligned} & (a \iff b) \land (b \iff c) \\ \implies & a \iff c \end{aligned}$$

Proposition 1.4.0.12. Reflexive property of $\iff$.

$$\begin{aligned} & a \\ \iff & a \end{aligned}$$

Proof of Proposition 1.4.0.12

$$\begin{aligned} & a \iff a & \\ \overset{\text{def}}{\iff} & (a \land a) \lor ((\neg a) \land (\neg a)) & \text{Definition 1.1.4.1} \\ \iff & a \lor ((\neg a) \land (\neg a)) & \text{Proposition 1.2.10.1} \\ \iff & a \lor (\neg a) & \text{Proposition 1.2.10.1} \\ \iff & \text{True} & \text{Proposition 1.2.11.1} \end{aligned}$$

1.5 Quantifiers

Definition 1.5.0.1. Universal quantifier is denoted by $\forall$.

$$\begin{aligned}&\forall x(P(x))\\ \overset{\text{def}}{\iff}\ &(P(x_1) \wedge P(x_2) \wedge \dots)\end{aligned}$$

Definition 1.5.0.2. Existential quantifier is denoted by $\exists$.

$$\begin{aligned}&\exists x(P(x))\\ \overset{\text{def}}{\iff}\ &(P(x_1) \vee P(x_2) \vee \dots)\end{aligned}$$

Proposition 1.5.0.3.

$$\begin{aligned}&(\forall c(a)) \wedge (\forall c(b))\\ \iff &\forall c(a \wedge b)\end{aligned}$$

Proposition 1.5.0.4.

$$\begin{aligned}&(\exists c(a)) \vee (\exists c(b))\\ \iff &\exists c(a \vee b)\end{aligned}$$

Proposition 1.5.0.5.

$$\begin{aligned}&P \vee (\forall x(Q(x)))\\ \iff &\forall x(P \vee (Q(x)))\end{aligned}$$

Proposition 1.5.0.6.

$$\begin{aligned}&P \wedge (\exists x(Q(x)))\\ \iff &\exists x(P \wedge (Q(x)))\end{aligned}$$

Axiom 1.1.

$$\begin{aligned}&\forall x(P(y))\\ \iff &P(y)\end{aligned}$$

Axiom 1.2.

$$\begin{aligned}&\exists x(P(y))\\ \iff &P(y)\end{aligned}$$

Proposition 1.5.0.7. De Morgan's law

$$\begin{aligned} &\neg(\forall b(a)) \\ \iff &\exists b(\neg a) \end{aligned}$$

Proposition 1.5.0.8. De Morgan's law

$$\begin{aligned} &\neg(\exists b(a)) \\ \iff &\forall b(\neg a) \end{aligned}$$

Definition 1.5.0.9. Uniqueness quantifier is denoted by $!\exists$.

$$\begin{aligned} &!\exists x(P(x)) \\ \overset{\text{def}}{\iff} &(\exists x(P(x))) \land (\forall x \forall y((P(x) \land P(y)) \implies (x = y))) \end{aligned}$$

Axiom 1.3. Axiom of Substitution

$$\forall x((\exists y((y = x) \land P(y))) \iff P(x))$$

1.6 Logic proposition

Proposition 1.6.0.1.

$$\begin{aligned} &a \land b \\ \implies &a \iff b \end{aligned}$$

Proposition 1.6.0.2.

$$\begin{aligned} &a \land b \\ \implies &a \end{aligned}$$

Proposition 1.6.0.3.

$$\begin{aligned} &a \land ((b \land a) \implies c) \\ \implies &b \implies c \end{aligned}$$

Proposition 1.6.0.4.

$$\begin{aligned} &a \land (a \implies b) \\ \implies &b \end{aligned}$$

Proposition 1.6.0.5.

$$\begin{aligned} &a \land (a \iff b) \\ \implies &b \end{aligned}$$

Chapter 2

Set theory

Set theory have one primitive notion, called set, and one binary relation, called set membership, denoted by $\in$.

Definition 2.0.0.1. Definition of $\notin$.

$$
\begin{aligned}
&\forall a \forall b (\\
&\qquad a \notin b \\
&\qquad \overset{\text{def}}{\iff} \neg(a \in b) \\
&)
\end{aligned}
$$

Definition 2.0.0.2.

$$
\begin{aligned}
&\forall a \in S, P(a) \\
\overset{\text{def}}{\iff} &\forall a((a \in S) \implies (P(a)))
\end{aligned}
$$

Definition 2.0.0.3.

$$
\begin{aligned}
&\exists a \in S, P(a) \\
\overset{\text{def}}{\iff} &\exists a((a \in S) \wedge (P(a)))
\end{aligned}
$$

Proposition 2.0.0.4.

$$
\begin{aligned}
&\forall a(\text{True}) \\
\iff &\text{True}
\end{aligned}
$$

2.1 Equality of sets

Definition 2.1.0.1. Definition of $=$.

$$\forall a \forall b ($$
$$a = b$$
$$\overset{\text{def}}{\iff} \forall c((c \in a) \iff (c \in b))$$
$$)$$

Definition 2.1.0.2. Definition of $\neq$.

$$\forall a \forall b ($$
$$a \neq b$$
$$\overset{\text{def}}{\iff} \neg(a = b)$$
$$)$$

Proposition 2.1.0.3. Reflexive property of equality.

$$\forall a ($$
$$a$$
$$= a$$
$$)$$

Proof of Proposition 2.1.0.3

$$\forall a ($$

	$a = a$	
$\overset{\text{def}}{\iff}$	$\forall b((b \in a) \iff (b \in a))$	Definition 2.1.0.1
$\iff$	$\forall b(\text{True})$	Proposition 1.4.0.12
$\iff$	True	Proposition 2.0.0.4

$$)$$

Proposition 2.1.0.4. Symmetric property of equality.

$$\forall a \forall b ($$
$$a = b$$
$$\iff b = a$$
$$)$$

Proof of Proposition 2.1.0.4

$$
\begin{aligned}
&\forall a \forall b(\\
&\qquad a = b \\
&\qquad \overset{\text{def}}{\iff} \forall c((c \in a) \iff (c \in b)) && \text{Definition 2.1.0.1} \\
&\qquad \iff \forall c((c \in b) \iff (c \in a)) && \text{Proposition 1.4.0.9} \\
&\qquad \overset{\text{def}}{\iff} b = a && \text{Definition 2.1.0.1} \\
&)
\end{aligned}
$$

Proposition 2.1.0.5. Transitive property of equality.

$$
\begin{aligned}
&\forall a \forall b \forall c(\\
&\qquad (a = b) \wedge (b = c) \\
&\qquad \implies a = c \\
&)
\end{aligned}
$$

Proof of Proposition 2.1.0.5

$$
\begin{aligned}
&\forall a \forall b \forall c(\\
&\qquad (a = b) \wedge (b = c) \\
&\qquad \overset{\text{def}}{\iff} (\forall d((d \in a) \iff (d \in b))) \wedge (b = c) && \text{Definition 2.1.0.1} \\
&\qquad \overset{\text{def}}{\iff} (\forall d((d \in a) \iff (d \in b))) \wedge (\forall d((d \in b) \iff (d \in c))) && \text{Definition 2.1.0.1} \\
&\qquad \iff \forall d(((d \in a) \iff (d \in b)) \wedge ((d \in b) \iff (d \in c))) && \text{Proposition 1.5.0.3} \\
&\qquad \implies \forall d((d \in a) \iff (d \in c)) && \text{Proposition 1.4.0.11} \\
&\qquad \overset{\text{def}}{\iff} a = c && \text{Definition 2.1.0.1} \\
&)
\end{aligned}
$$

Axiom 2.1. Axiom of extensionality

$$
\begin{aligned}
&\forall a \forall b(\\
&\qquad a = b \\
&\qquad \implies \forall c((a \in c) \iff (b \in c)) \\
&)
\end{aligned}
$$

Axiom 2.2. Substitution of $\in$.

$$
\begin{aligned}
&\forall a \forall b(\\
&\qquad \exists c((c = b) \wedge (a \in c)) \\
&\qquad \iff a \in b \\
&)
\end{aligned}
$$

Axiom 2.3. Substitution of =.

$$\forall a \forall b($$
$$a = b$$
$$\iff \forall c((c = a) \iff (c = b))$$
$$)$$

Axiom 2.4. Existence of empty set

$$\forall a($$
$$a \notin \emptyset$$
$$)$$

Proposition 2.1.0.6. Uniqueness of $\emptyset$

$$\forall a($$
$$\forall b(b \notin a)$$
$$\iff a = \emptyset$$
$$)$$

Proof of Proposition 2.1.0.6

$$
\begin{aligned}
&\forall a(\\
&\qquad \forall b(b \notin a) \\
&\iff \forall b((b \notin a) \iff (\text{True})) && \text{Proposition 1.4.0.1} \\
&\iff \forall b((b \notin a) \iff (b \notin \emptyset)) && \text{Axiom 2.4} \\
&\overset{\text{def}}{\iff} \forall b((\neg(b \in a)) \iff (b \notin \emptyset)) && \text{Definition 2.0.0.1} \\
&\overset{\text{def}}{\iff} \forall b((\neg(b \in a)) \iff (\neg(b \in \emptyset))) && \text{Definition 2.0.0.1} \\
&\iff \forall b((b \in a) \iff (b \in \emptyset)) && \text{Proposition 1.4.0.10} \\
&\overset{\text{def}}{\iff} a = \emptyset && \text{Definition 2.1.0.1} \\
&)
\end{aligned}
$$

Proposition 2.1.0.7. Single choice

$$\forall a($$
$$a \neq \emptyset$$
$$\iff \exists b(b \in a)$$
$$)$$

Proof of Proposition 2.1.0.7

$$
\begin{aligned}
&\forall a(\\
&\qquad \text{True} \\
&\iff (\forall b(b \notin a)) \iff (a = \emptyset) && \text{Proposition 2.1.0.6} \\
&\iff (a = \emptyset) \iff (\forall b(b \notin a)) && \text{Proposition 1.4.0.9} \\
&\iff (\neg(a = \emptyset)) \iff (\neg(\forall b(b \notin a))) && \text{Proposition 1.4.0.10} \\
&\overset{\text{def}}{\iff} (a \neq \emptyset) \iff (\neg(\forall b(b \notin a))) && \text{Definition 2.1.0.2} \\
&\iff (a \neq \emptyset) \iff (\exists b(\neg(b \notin a))) && \text{Proposition 1.5.0.7} \\
&\overset{\text{def}}{\iff} (a \neq \emptyset) \iff (\exists b(\neg(\neg(b \in a)))) && \text{Definition 2.0.0.1} \\
&\iff (a \neq \emptyset) \iff (\exists b(b \in a)) && \text{Proposition 1.2.17.1} \\
&)
\end{aligned}
$$

Axiom 2.5. Existence of pair set

$$
\begin{aligned}
&\forall a \forall b \forall c(\\
&\qquad c \in \{a, b\} \\
&\iff (c = a) \lor (c = b) \\
&)
\end{aligned}
$$

Proposition 2.1.0.8. Uniqueness of pair set

$$
\begin{aligned}
&\forall a \forall b \forall c(\\
&\qquad \forall d((d \in c) \iff ((d = a) \lor (d = b))) \\
&\implies c = \{a, b\} \\
&)
\end{aligned}
$$

Proof of Proposition 2.1.0.8

$$
\begin{aligned}
&\forall a \forall b \forall c(\\
&\qquad \forall d((d \in c) \iff ((d = a) \lor (d = b))) \\
&\iff \forall d(((d \in c) \iff ((d = a) \lor (d = b))) \land (\text{True})) && \text{Proposition 1.2.6.1} \\
&\iff \forall d(((d \in c) \iff ((d = a) \lor (d = b))) \\
&\qquad \land ((d \in \{a, b\}) \iff ((d = a) \lor (d = b)))) && \text{Axiom 2.5} \\
&\iff \forall d(((d \in c) \iff ((d = a) \lor (d = b))) \\
&\qquad \land (((d = a) \lor (d = b)) \iff (d \in \{a, b\}))) && \text{Proposition 1.4.0.9} \\
&\implies \forall d((d \in c) \iff (d \in \{a, b\})) && \text{Proposition 1.4.0.11} \\
&\overset{\text{def}}{\iff} c = \{a, b\} && \text{Definition 2.1.0.1} \\
&)
\end{aligned}
$$

Proposition 2.1.0.9. Substitution for pair set.

$$\forall a \forall b \forall c(\\ a = b \\ \implies \{a, c\} = \{b, c\} \\ )$$
